“There are three responses to a piece of design  
yes, no, and WOW!  
Wow is the one to aim for.” - Milton Glaser

Yardley Bespoke offer bespoke manufacture &  
finishing solutions for the high end interior, exterior,  
design and build sectors.

We have a passion for adding the wow to already  
amazing products as well as the design,  
development and manufacture of our own pieces.

Thank you for the interest in our services.

A handwritten signature in black ink that reads "James Yardley". The signature is fluid and cursive, with a large initial "J" and a stylized "Y".

### Ancient bronze

Gloss lacquered

Ancient bronze a luxurious metal finish, exudes timeless sophistication. It's rich, dark tones evoke a sense of history, adding opulence and character to contemporary designs.

Also available in

Satin lacquered

Matt lacquered

Raw living

### Brass Patina

Raw living

Raw brass patina was created to match the Patinated brass finish by Quooker™. As a raw finish it has been designed to change over time making it perfect for discerning, personalised spaces.

### Dark smoked bronze

Gloss lacquered

Dark smoked bronze, a chic metal finish, captivates with its deep, smoky allure. This assures modest sophistication, seamlessly blending opulence and contemporary design.

## Gloss lacquered

Gloss lacquers are applied using a 4 stage electrophoretic process and protect the underlying surface finish from wear and tear.

We recommend the occasional use of a soft damp cloth to clean the finish. Do not use chemicals or abrasive cleaning products as they could damage the protective lacquer. Always dry the surface after use.

## Satin lacquered

Satin lacquers are applied using a 4 stage electrophoretic process and protect the underlying surface finish from wear and tear.

We recommend the occasional use of a soft damp cloth to clean the finish. Do not use chemicals or abrasive cleaning products as they could damage the protective lacquer. Always dry the surface after use.

## Matt lacquered

Matt lacquers are applied using a 4 stage electrophoretic process and protect the underlying surface finish from wear and tear.

We recommend the occasional use of a soft damp cloth to clean the finish. Do not use chemicals or abrasive cleaning products as they could damage the protective lacquer. Always dry the surface after use.

## Raw living

Raw living finishes will develop individual patina colouration over time. Water marks will appear almost immediately and the surface will develop a unique and beautiful finish.

Do not use chemicals or abrasive cleaning products as they may damage the bare metal surfaces. Application of a non silicone based natural furniture wax such as Aristowax Woodsilk™ is recommended.

## Coated

Coated finishes are available in virtually any colour or gloss level imaginable and are incredibly useful when trying to match hardware to an existing colour scheme.

It is advisable to dry your product after use. Do not use harsh chemicals or abrasives for cleaning. Application of a non silicone based natural furniture wax such as Aristowax Woodsilk® is recommended to enhance finish protection.

## Ceramic coated

Ceramic coatings represent the most durable of all our finishes. They rival the chemical and abrasion resistance of traditional finishes such as PVD coating, chrome and anodising.

No special care should be needed other than good housekeeping. We never recommend the use of strong chemical or abrasive cleaning products.
